Bizora

What Bizora is

Bizora is a multi-business management platform. We onboard your business onto its own digital workspace and configure it around how you actually work — then you run your customers, orders, jobs, payments and accounts from one place, on web and mobile.

- ✓ **Business name & branding**
- ✓ **Modules**
- ✓ **Item types**
- ✓ **Workflow stages**
- ✓ **Payment methods**

Configurable per business — no code, no development project.

Bizora

How it works

Each business is created on a template that fits its trade. From there your workspace is configured: modules, workflow stages, item types, payment methods, custom fields, branding and team roles. Nothing is one-size-fits-all — and nothing needs code.

01 Tell us your business
What you do, what you sell, who works with you. We pick the template that fits — or start from a configurable workspace.

02 We configure your workspace
Modules, workflow stages, item types, payment methods, custom fields and your branding. Your words, your process.

03 You run it, everywhere
Sign in on the web or the Android app, invite your team, and watch every job move stage by stage.

Bizora

Businesses it fits

Templates ship for tailor, furniture, carpenter, auto workshop and printing, plus a configurable generic workspace. New business types are configured on the platform rather than built from scratch.

Tailor **Furniture** **Carpenter** **Auto Workshop** **Printing** **Generic**
